Patient: Morgan Vale

DOB: 1962-04-18

MRN: SYN-PDF-001

Encounter date: 2026-03-10

Planned procedure: Elective laparoscopic cholecystectomy on 2026-03-18

Clinician: Elena Brooks, PharmD

ACTIVE MEDICATIONS

1. Apixaban 5 mg tablet

Sig: Take 1 tablet by mouth twice daily.

Status: ACTIVE.

Perioperative instruction: HOLD 72 hours before planned procedure.

Last planned dose: evening of 2026-03-14.

2. Metformin 500 mg tablet

Sig: Take 1 tablet by mouth twice daily with meals.

Status: ACTIVE.

Perioperative instruction: HOLD morning of procedure only.

3. Lisinopril 10 mg tablet

Sig: Take 1 tablet by mouth every morning.

Status: ACTIVE.

Perioperative instruction: Take as usual unless anesthesia instructs otherwise.

STOPPED MEDICATIONS

Ibuprofen 200 mg tablet was used as needed for knee pain.

Status: STOPPED on 2026-03-10 because patient is anticoagulated.

Do not restart before surgery.

MEDICATION ALLERGIES / ADVERSE REACTIONS

Warfarin - severe rash reported in 2019.

This is an adverse reaction history and is not a current medication.

Patient verbalized understanding of hold instructions.
